Fire Destroys Garage Cars and Work Shop

Loss is Estimated at Between \$1,000 and \$1,200

A fire completely destroyed the work shop and garage on Mrs. H. J. Cox's property last Saturday afternoon, together with two old cars and a full equipment of mechanical tools which were the collection of years. It is estimated the loss will be between \$1,000 and \$1,200. There was no insurance on the building or contents.

Lita thought the fire must have started from an over heated heater which the boys had lit. It is doing some work in the work shop. The had just left the shop to go to dinner a short time before the fire was discovered.

A fire brigade got out in good time but as the flames had enveloped the building before the alarm was given, it was impossible to see it, so the brigades confined their activities to saving the adjoining buildings.

The greatest loss will probably be the fine assortment of tools which had been accumulated by the late Mr. Rutherford who died a year ago.

BUFFALO ROUND-UP HELD IN ALBERTA

The annual slaughter of surplus buffalo in Watnright national park, where is quartered the last remaining herd, has been under way more than 1,200 being killed off. A large quantity of the meat is shipped to eastern markets. Some of the meat is being made into pemican for the Indians and Eskimos of the far north.

ALBERTA TURKEYS Shipped to Britain

Alberta being the leading province in Canada for turkey production, the usual large shipments to the outside markets for the fall and Christmas trade have commenced. Producers annually ship some 75 carloads from the province to these markets. This year a shipment has already been made to the British market.

The local clinic will be held in Gordon Memorial school room on Wednesday afternoon, Dec. 21st.

A pleasant evening was spent at Mrs. Kerr's last Thursday evening when the young ladies' bridge club met at her home for their weekly game. Miss Elsie Frey won the prize for the evening. After cards a jolly hour was spent in which music and games were the order.

A number of their friends met at the home of Mr. and Mrs. R. C. Hargrave Wednesday evening and sprang a surprise party on them to celebrate the 15th anniversary of their wedding. Progressive bridge was played and the prizes were won by Mrs. Hicks and E. L. Stone. While at lunch Mr. and Mrs. Hargrave were presented with an anniversary gift by those present.

Local Legion Elects Officers for 1933

H. J. Cox Will Be The New President

At the monthly meeting of the local Legion held last Sunday afternoon, the following officers were elected for the coming year:

Hon. Pres.—R. S. Hodge
Hon. Vice Pres.—J. E. Tarrant
Pres.—H. J. Cox
Vice Pres.—J. Hope
Ex. Com.—Rev. M. Stewart
B. Sheldon, H. Johnson, A. E. Shaw and H. Lepar.

B. Allison, the retiring president, thanked the officers and members for the support they had given him during his term of office, and expressed the hope that the same support and encouragement would be given his successor and other officers. A vote of thanks to the retiring officials was also passed.

MANY WOMEN HAVE TAKEN HOMESTEADS

Almost one third of the homesteads taken over since July 2, 1901, in Alberta under the new provincial government regulations, have been secured by women. When Alberta took over its own lands, the regulations covering homesteading rights were changed to provide for a three years residence in the province before entry for homesteads could be made, and also to permit women, whether married, single, widowed, or single land. As a result the number taken by women since she has been 2,292 compared with 5,021 taken by men.

The first hockey game of the season will be played on the Community Rink on December 18 at Redcliff. The Rovers will play the Hustlers at 1 P.M. the winners will play the Redcliff Rangers at 3:30 P.M. All are invited to attend the opening game and we will greatly appreciate your support.

Churches

ST. MARY'S CHURCH

Celebration of Mass every Sunday of each month except first Sunday at 8:30 a.m.

ST. AMBROSE'S CHURCH

Rev. M. L. St. Clair, Vicar
9 a.m. Holy Communion.
10 a.m. Sunday school.
1st and 3rd Sundays
11 a.m. Moral instruction.
2nd, 4th and 6th Sundays
11 a.m. Matins and 9 p.m. Evensong and sermon.

GORDON MEMORIAL

UNITED CHURCH

Pastor Rev. R. E. Povey
Sunday, Nov. 27th.
10 a.m. Church School.

11:15 a.m. M. song Worship
Subject: "Loving Faithful men."

7:30 p.m. Evening Worship.

Subject: "Be Still and Know that I am God."

"As a man thinketh in his heart, so is he and so is his world."

Annual Meeting of Gordon Memorial W.M.

H. H. Champ Was Presented With Life Membership

The Annual Meeting of the W. M. Society of Gordon Memorial Church was held on Monday evening when Rev. Willis Caine gave the address. Mrs. Caine sang a solo and Joan Balmer also sang. Mrs. Caine acted as pianist. The interesting feature of the evening was the presentation of a life membership certificate to Mrs. H. H. Champ the last of the chartered members to receive this honor. The male boxes were collected and the ladies expect to gain their allocation at the end of the year.

CIAL PRODUCTION IN ALBERTA GROWS

Some stimulus to the coal industry in Alberta is indicated in the figures for production for the ten months of this year ending October 31, as compared with the same period of 1931. This year's production for the period has been 3,739,975 tons as compared with 5,435,900 tons for last year's period, an increase of 504,074 tons. In October alone there was an increase of 148,600 tons over the same month of last year.

"Happy" Jack, of Elkwater Lake fame, is spending a few days in the west visiting friends. He is also entertaining them with selections on his new flute which he has just imported from China.

Skating Rink Social Not Well Attended

But Those Who Were Present Had Good Time

The whist drive and dance held last Friday evening under the auspices of the skating rink committee, was not as largely attended as it should have been. This, however, was in our opinion largely due to the lack of advertising, as few people knew anything about it till after it was over.

Only a few tables took part in the drive but the crowd grew considerably when the music commenced for the dance.

Although the prizes, lunch, etc. were donated, there will be nothing left for the rink funds after expenses are paid. This is unfortunate as those who made it up worked hard to make it a success. However all who were present had a thoroughly enjoyable evening.

Head military officers are in town today from Calgary and will inspect Armories tonight.

Capt. A. E. Osmond, spent last week-end in Calgary writing up his examinations for M. S. C.

Until today the weather has been very mild but during the night the thermometer dropped to 15 below.

"The Ladies' Auxiliary to the local Legion will hold their annual Christmas Tree entertainment in the I. O. O. F. hall on Tuesday evening, Dec. 20th. The program will commence at seven o'clock promptly.

Bennett Addresses British Notables

Declares Empire Will Prosper—Resisting Crisis

In an earnest plea before an audience of notables, in London, England, Prime Minister R. B. Bennett of Canada urged that agreements growing out of last summer's conference be considered rather in the light of the hope they offered for the future than in that of present accomplishments.

Mr. Bennett spoke at an informal dinner in his honor which was presided over by Sir R. B. Horne, a former Conservative Chancellor of the exchequer.

Signs were lacking in Canada now, he said, of benefits from the conference agreements.

They marked, he declared, recognition of the principle of unity, "of determination that henceforth we march forward" together. "I believe that as a result of these agreements in years to come this far flung Empire of ours will become crime-resisting, sustained by the arrangements of the Ottawa Conference."

Mr. Bennett spoke of the pride that all Canadians felt at the courage and determination of the Mother Country to win through in its great struggle with the depression. He declared it his belief that on the basis of common purpose of which all Ottawa agreements were evidence, foundations could be laid of an empire that would dwarf into insignificance that already built.

Interesting Doings at St. Ambrose Church

The popularity of the St. Ambrose church has been on the increase. The crowd at the social on Monday last was bigger than ever, and everybody had such a good time that the orchestra was persuaded to play it one o'clock instead of midnight as usual. There were eight tables of waltz and three of bridge, and quite a number turned up later for the dance. Mrs. Maudie Hill carried home a chicken as ladies' first prize for whist, the gentlemen's first going to T. Jones. The first prize for bridge was won by Miss Elsie Frey and her consolation was awarded to Mrs. Lahey.

A feature of the evening was the introduction of a number of old time dances at the special request of some of the guests and these were thoroughly enjoyed by young and old alike. One's mind went back to an ancient night. "You should see me when the police" and I would have done anyone's heart good to see the joyous abandon with which the old favorite was performed. The next of these dances will be held on Monday, Dec. 26th, and it would be hard to find a better orchestra place in which to celebrate the Xmas Holiday.

A very successful whist and bridge tournament in the parish hall on Wednesday afternoon by the St. A. S. This prizes were won as follows: Bridge first prize, Mrs. H. L. L. second prize, Mrs. H. J. Hodge. Whist first prize, H. J. Cox; consolation, Mrs. McClary. A very dainty lunch was served after the card games, and the afternoon was thoroughly enjoyed by all present.

A very successful evening was spent at the young people's social club in the parish hall on Tuesday evening, all but two of the thirty members being present. It was arranged that an invitation social evening would be held by the club on Tuesday, December 27th which will take the form of a Christmas party in which each member will invite one friend. Enter the club home to hold an open social to which the parents of the members will be invited. Some of the young men of the club are arranging to sing carol in the old fashioned way on Christmas Eve and it is hoped that this feature will meet with the success it deserves.

I am expected that new lights will be installed in St. Ambrose Church this week. This will greatly improve both the lighting and the appearance of the church interior.

Mr. Andrew W. H. Foster of Herdley, Man., arrived in town a week and will be the guests of their daughter, Mrs. A. N. Colford, and Mr. Colford, for the winter.

There is a nice sheet of ice on the rink now and it is being fairly well patronized by the young folks. Hockey players and their first workout the beginning of the week and are now making arrangements to get organized.

Taking the School to the Scholar

Providing schooling for children in the isolated sections of Northern Ontario long baffled the Ontario Department of Education. The little red school house—of it had been built—would have stood alone with no sign of human habitation for miles around or, if there had been a few houses near, the cost of upkeep would have been too heavy a burden on a few scattered farms. It is the Canadian Pacific Railway was called into consultation and the result is the travelling school car which has been operating during the winter months with increasing success for the past few years. Every child loves a train, but when that train comes especially to him and becomes his school—well, you have to go to fairy tales to get the like of that. So they come enthusiastically from miles around, French-Canadians, Rumanians, Indian, Italian, English-Canadian—all races and ages from five to fifteen years of age. They come on snowshoes, skis, by dog teams, from near and far. They get the three R's and they get acquainted among themselves. Differences of speech make little difference to them and soon they are all using English. Children of pioneers, they are bright and keen. Lay-out shows exterior of car, interior with class of boys and girls all get for lessons; another interior showing teacher and black board; and two typical school children on their way to the car.

Soil Moisture Experiments

Grain Crops Use Moisture At Rapid Rate During Growing Season

Experiments on soil moisture, conducted at the Dominion Experiment Station, Swift Current, Sask., have revealed some surprising facts on the vital importance of moisture in the production of grain. Grains needed in many sections of the prairie rarely receive sufficient moisture to produce a normal growth. The prospect of heavy yields is frequently spoiled by spells of dry weather as the season advances.

Grain crops can use water, during their growth, at a surprisingly rapid rate and in considerable volume. During the past season at Swift Current a crop of wheat used a total of eighteen and a half inches of water. Eight inches of this came in the form of rain during the growing period and the balance was present as available water in the soil. The rate of use of water by the crop was at first slow; for the first two weeks after emergence it averaged the equivalent of six-hundredths of an inch of rain. This rate rapidly increased with growth and reached a maximum of forty-eight-hundredths of an inch during the week commencing June 15. In this week the crop used water equivalent to forty-three per cent of the total rainfall. After June 20 the rate of use of water fell off rapidly and at harvest was again only six-hundredths of an inch daily. The foregoing is an average of crop produced under almost ideal conditions. Much less favorable conditions existed for a crop sown on land which resembled summer-fallow in the field. This crop received the same amount of rainfall, but only the equivalent of three hundredths of an inch of water was available in the soil. Until June 15 both crops used water at the same rate. From this date the crop was noticeably different. An examination of soil moisture conditions showed that in the seven-day period from June 15 to June 22 the summer-fallow had used forty-eight per cent of its total moisture reserve, while by June 22 only a very small quantity remained.

Wheat crops, when subject to deficient moisture conditions, pass through so-called critical periods, when the absence of sufficient moisture definitely depressed the yield of grain. In the cases quoted the first crop was at no time subjected to any critical period. The second crop, corresponding to that sown on summer-fallow, was subjected to a critical period, corresponding to that sown on summer-fallow, was subjected to a critical period, corresponding to that sown on summer-fallow, was subjected to a critical period.

Award Goes To Galworthy

Second Englishman To Win Nobel Prize For Literature

The 1933 Nobel prize for literature has been awarded to John Galsworthy, the British novelist. The author of "The Forsyte Saga" had been mentioned in newspaper predictions as the probable recipient of the award. Last year's prize was won by Erik A. Rostad, of Sweden.

Only one other Englishman has won the reward for literature. Rudyard Kipling took it in 1907. George Bernard Shaw, an Irishman, won it in 1925.

The most famous of his works, of course, are his comedies, of which the Forsyte series, which trace the fictional history of the Forsyte family in England and abroad.

He also has engaged successfully in the drama, a field in which his notable productions include "Loyalties" in 1922 and "Old English" in which George Arliss was an outstanding success. He also wrote "The Forsytes" in 1926 and "Forsytes" three years later, and a number of other plays.

Extraordinary Visibility
From the summit of Mount Washington, New Hampshire, loftiest peak in the east, observers recently were able to see Montreal, more than 100 miles northwest of there. The day was described as "effortless" use of parallel with the memory of the other inhabitants.

First Prank: "What would you do if you won the first prize in the big sweep?"
Second Prank: "I'd have the blinker park benches upholstered."

Third Prank: His effects are only half.

W. N. O. 1939

Insulating Material From Rock

Rock Wool Is One Of The Most Effective Insulating Materials

As an outcome of the trend toward a greater use of insulating material in the construction of homes and offices, and in other fields, the Canadian Government Department of Mines foresees the establishment of a rock wool manufacturing industry in Canada. Should this material as the development of the large deposits of dolomite in the Niagara Peninsula of Ontario would follow. It is stated. Surveys conducted by the Department disclosed the presence of these self-fluorescing, argillaceous deposits and researches indicated their suitability as raw material for the manufacture of rock wool. At present the total requirements of the product are imported.

Rock wool is one of the most effective insulating products on the market. It is made by melting suitable natural rock to a very fluid condition in a cupola furnace using coke as fuel. The molten material issues from the furnace in a small stream, and is atomized by a blast of steam, which converts it into a mass of fine, pliable, colorless, glassy fibres. These fibres constitute the rock wool. It is very similar to glass wool in most respects to slag wool, but is practically free from the deleterious elements, sulphur, compounds of which are sometimes found in objectionable quantities in slag wool.

The insulating value of rock wool is due to the matrix of tiny air cells entrained with the interfused fibres. Its field of usefulness for insulating purposes ranges from the lowest in temperature up to 1,000 degrees Fahrenheit. It is marketed for a wide variety of uses including building construction, for gas and electric stoves, and refrigerators; covering for steam pipes, oil stills, hot water pipes, boilers and furnaces. It is also the principal ingredient of an insulating cement, and of an acoustic tile, the latter being used extensively in offices, motion picture theatres and auditoriums.

Chinese Use Pictures

Children Are Taught By Sight Instead Of Sound

Douglas W. Thompson, writing in the Contemporary Review, London, says: "What is a specialist's work with us is the established literature of the Chinese. They use a syllable, are not troubled with parts of speech, have no declensions rubbed into the child's mind, but an enormous number of pictorial pictures, each depicting a scene or thing. Every object is depicted by a picture of how it appears to the eye and heart. The majority of these pictures are thousands of years old, and are so vivid notes of the world of men through many centuries. While an English word is the symbol of a sound, the Chinese word is a picture of a thing or a number of things in relation to each other. It is not a word, but a whole idea, so lovely, so beautiful, so nearness to pictures? The basis is a series of pictures of substantial things which are easily suggested by a few strokes of the brush. The sun is drawn with four strokes and looks like a Greek letter. A man is drawn with a single stroke, like a Greek letter. The basis is a series of pictures of substantial things which are easily suggested by a few strokes of the brush. The sun is drawn with four strokes and looks like a Greek letter. Curious Family Word

Daughter Was Originally "Duhitar"

What a curious family word. Perhaps the most curious of the family words is daughter. In old English the "gh" was sounded rather like the "ch" in the Scottish loch. The root of the word is doch or dach; the "ter" signifies, just as it does in later and more modern words. The word's history runs back through old English, German, Greek and Sanskrit to "duhitra." The "h" in this last word is a peculiar one, for it was pronounced almost like the "ch" just mentioned. But "duhitra" does not mean just a female child. It means the well-known Our early ancestors were a farming people, and when a girl baby arrived they said: "Here's another little milkmaid."—London Times.

The Double Window Task

Every Man Has Double Window Task To Solve

It's an odd trait in the average man that he will follow beaten tracks rather than disturb routine by making new paths. Now in the matter of storm windows man permits himself to become a martyr to custom and a slave to worry. Double windows are a night-mare to most all householders. The average of accidents to persons in putting up storm windows must be very high indeed. Preceding every winter the dread task is faced with trepidation by the majority of men. It is a mystery. Standard window frames actually invite indoor storm winds and they could then be blown down. They are thousands of years old, and are so vivid notes of the world of men through many centuries. While an English word is the symbol of a sound, the Chinese word is a picture of a thing or a number of things in relation to each other. It is not a word, but a whole idea, so lovely, so beautiful, so nearness to pictures? The basis is a series of pictures of substantial things which are easily suggested by a few strokes of the brush. The sun is drawn with four strokes and looks like a Greek letter. A man is drawn with a single stroke, like a Greek letter.

There doesn't need to be any genius or mechanical science, or money, to erect homes without the requirement of this oppressive, dangerous, dog-gone job. Any elementary architect could design any home where the double windows can just click on inside! Why they do not do it is a mystery. Standard window frames actually invite indoor storm winds and they could then be blown down. They are thousands of years old, and are so vivid notes of the world of men through many centuries. While an English word is the symbol of a sound, the Chinese word is a picture of a thing or a number of things in relation to each other. It is not a word, but a whole idea, so lovely, so beautiful, so nearness to pictures? The basis is a series of pictures of substantial things which are easily suggested by a few strokes of the brush. The sun is drawn with four strokes and looks like a Greek letter. A man is drawn with a single stroke, like a Greek letter.

A Large Industry

It has been estimated that 140 tons of live bees have been shipped from California since during the past year. When one stops to consider how many colonies of bees 140 tons would make and that this number is shipped from the one State of California. It is realized that beekeeping is a large industry than most folks realize.

Stockholders' Phone Lines

There were 6,853 poles and 48,624 wire miles of long distance telephone lines in Saskatchewan at the close of the last fiscal period, according to the most recent report of the department of telephones.

William Green has Just Completed

THE PRINCE WAS DISCOVERED BY HIS SUBJECTS WHO WERE TO BE KILLED BY HIM.

Dismal Lakes—Coppermine

Part Of Canada's Far North Shown On New Map

Coppermine River! What a gallery of mental pictures is conjured up by the name—of Samuel Hearne battling his way to the river in 1771; of Sir John Franklin and those who later sought for him; of lonely Coppermine as described by explorers earlier in the present century; and now a vision of an increasing throng of prospectors searching not unsuccessfully on down the river area for the copper-bearing rocks and for those containing more precious metals.

Coppermine River is 332 miles in length, flowing northerly and emptying into Coronation Gulf of the Arctic Ocean. It is a fast flowing river, running in a well defined valley with frequent rapids. This valley where it crosses the treeless Arctic plains forms a shelter for a stunted and stunted growth of timber and willow brush. Ever since Samuel Hearne searched for the source of the copper reported by the natives, practically every succeeding expedition has reported finding copper in some form in the vicinity of the river. During very recent years prospecting by means of aerial transportation has resulted in several finds of copper ore and work is being carried on now on prospect at Bonville Lake which lies between the river and Dismal Lakes. These lakes, which look like river expanses, flow through Kendall River into the Coppermine River.

Coppermine River, Dismal Lakes and a portion of Coronation Gulf are shown on a new map sheet of the National Topographic Survey, Department of the Interior, Ottawa, which may be obtained at a nominal price. This map is on the scale of four miles to an inch and has been prepared from aeroplane photographs taken by the Royal Canadian Air Force. It is the most northern map of this series available up to date, and adds considerably to the geographical knowledge of this far northern country.

The country mapped is part of the Arctic plains of Canada, which support a generous growth of ground cover, shrub willows, mosses, lichens, heather and coarse grasses and sedges. These furnish sustenance for the caribou which migrate hither during the summer season, but drift back to the wooded northern districts to spend the Arctic winters with their herds. Moose and reindeer also find as well as wolves, Arctic hare, Richardson's ground squirrel, voles, foxes, and occasionally bear. Along the coast are found seals, walrus, and belugas. All the common ducks and geese frequent the marshes and swamps, while grouse and ptarmigan are found throughout this part of the Territories.

This area is famed in the history of Arctic exploration as indicated by names of some of the topographical features. Thus Bloody Falls on the Coppermine River were named by the explorers on account of the savage massacre of a band of Eskimos at this place by the Indians who accompanied them from Hudson Bay. The name Horsey Hill recalls that hardy adventurer and explorer John Horsey, who spent many years in this country. Hudson Hope derives its name from David Hanbury, English explorer and sportsman, who made a memorable trip through this region in 1902. Richardson River and Bay are named after Sir John Richardson who explored there in 1858. Kendall River was named after David Kendall, who accompanied Richardson, and Rae River after Dr. John Rae of the Hudson's Bay Company, who was steering off from 1848 to 1851 were indebted for much of the information relative to this area. Deane River recalls the explorations and surveys of Peter Warren Deane who together with Thomas Simpson, both Hudson's Bay Company officials, worked in this region in 1837 and 1839.

At the mouth of Coppermine River is a small settlement including a Hudson's Bay Company's trading post, Anglican and Roman Catholic missions, and a Dominion Government radio telegraph station. At certain seasons considerable numbers of natives gather here to exchange their furs for trade goods.

On the same reported by the investigators of the Department of the Interior as suitable for rendering grazing land use, for it was near Bear Lake and extends to Coppermine River and Coronation Gulf. At the present time a herd to serve as a source of future numbers is being driven eastwards from Alaska to their new home in the northern plains of Canada.

Canada's great Problem

Finding Export Market For Wheat At Fair Price

If there was any doubt heretofore as to Canada's greatest problem, publication of the Government's estimate of this year's wheat yield settled the matter. It is the production of wheat. The Government's statistical branch estimates that we have produced this year 1,000,000,000 bushels of wheat. The Government not long ago reported a carry-over from 1931 of 130,000,000 bushels of wheat. That is a total of 1,130,000,000 bushels, or practically 600,000,000, a tremendous volume.

We know that the acreage seed and feed requirements of the Dominion amount to 75,000,000 bushels, while the average carry-over prior to 1928 was 70,000,000 bushels. That makes 145,000,000 bushels, but allowing good measure, let us say that Canada needs 200,000,000 for the year's use and as a reserve. We have left 600,000,000 bushels of which we must dispose this crop year, that is up to next July 31, if we are not to have a serious prospecting by means of aerial transportation has resulted in several finds of copper ore and work is being carried on now on prospect at Bonville Lake which lies between the river and Dismal Lakes. These lakes, which look like river expanses, flow through Kendall River into the Coppermine River.

To get rid of 400,000,000 bushels of wheat we must export either at wheat or flour 1,100,000 bushels daily. That is double what we exported last year. It is a tremendous task. It is a task which will worry themselves sick over the fate of a tinpot factory, but they go joyously on their way when the problem of finding an export market for Canada's wheat, which will return to the grower a fair price, is at hand. It is a task which will tackle this problem with a determination to find a solution, there can be little probability in this fair Dominion.—Leitbridge Herald.

Built Cabin On Border

Shorelander Ate In Canada and Slept In United States

"Ravidsack Jack" Moore, border old-timer, is dead. "Ravidsack Jack" was a well-known figure in the border town of Blaine, Idaho, and he had the unique distinction of being the only man who had lived in both the United States and ate his breakfast in Canada without leaving his home. His cabin was built on the international border, just north of Blaine, and he lived in the United States and the Coast, Alberta, folk boasted that "Ravidsack Jack" had the finest flagpole in the northwest.

This famous western shack was stood there for 30 years or more. It was first built for use as a sheep camp bunkhouse, and out of defiance to "Ravidsack Jack" the authorities of the United States refused it to stand without molestation.

Born in Texas, he came to Montana and Alberta years ago. He was of modest means, but lived in a shack at 300 pounds, and in his earlier days was famous and feared for his strength. He was known in the old pre-Vietnam days as "Ravidsack Jack" could handle the toughest character with ease.

An Amazing Road Structure

New Jersey To Have Elevated Highway Three Miles Long

An elevated super-highway, one of the world's most amazing road structures, is being rushed to completion between Jersey City and Newark, N.J.

Stretching across three miles of marshy meadows in Jersey, the giant structure, which is now beginning to look like some dream from the mind of Jules Verne, will permit the covering of a distance of five miles which now require anywhere from 20 minutes upward.

The concrete roadway, suspended from 100 to 150 feet in the air, crosses the Passaic and Hackensack rivers, railroad tracks and yards and highways. Eighteen million cars yearly are expected to flow over the specially designed concrete pavement on the viaduct.

Might Be Worse

No matter how hard up you may be, flow down and hope for your case in.

There's always someone around you who's worse off than you are.

With whom you'd not wish to change places.

Do you wish it more economical to do your own cooking?

"Certainly! Since I have been cooking I haven't only lost half what I used to."

Reason constitutes the bond between God and ourselves.

WORLD HAPPENINGS BRIEFLY TOLD

Both houses of the Bahamas legislature approved the Ottawa economic conference agreements unanimously.

Germany has completed delivery of Soviet Russia's order for 350,000 tons of iron and steel.

Prime Minister Ramsay MacDonald vehemently criticized laudatory preparations for the projected world economic conference in the House of Commons.

Dr. Howard Carter, the sole survivor of that little party which, led by the late Lord Carnarvon, discovered the tomb of Tutankhamen, has left once more for Egypt.

Forty-three men and one woman have started working against time to whip into shape before Christmas a constitution for India's population of 350,000,000.

Jobless men who turned to prospecting for gold along the Fraser River and its tributaries during the summer months, have met with gratifying success, according to reports received at the Chamber of Mines, Vancouver.

The power of the Minister of National Revenue to fix valuations for customs duty on imports to Canada will be curtailed by the adoption of Bill No. 6, an act to amend the Customs Act, which was passed by the House of Commons.

Princess Irene, English wife of the Russian Bolshevik, and widely acclaimed as one of England's most beautiful women, has been granted a decree nisi of divorce from Prince George Irene, on the grounds of misconduct.

For the three years ending March 31, 1932, a total of 26,864 persons were deported from Canada, according to a return tabled in the House of Commons recently. More than one-third, or 9,573 were English, while the next largest national group were Scots, who numbered 2,600.

Relief tickets entitling the bearer to food and bed will soon be offered for sale to Winnipeg citizens, who, in turn, may distribute them to needy men. The tickets, which will assure the donor his contribution is being used for its intended purpose, will sell at 10 cents each.

A "potato famine" is foreseen early in the new year, says the Toronto Star, as a result of widespread "late blight" and "late blight" in the Ontario crop. Farmers of the province will lose at least one-fifth of their harvested crop, representing a cash value of about \$1,000,000, says the newspaper.

SOURD ON THE WORLD?—THAT'S LIVER

Wake up your Liver!
 No Calomel necessary
 Many people who feel weak, sluggish and generally unwell, make the mistake of using calomel, or other purgatives, to get the bowels moving. This is a mistake, for these drugs do not cure the liver, but only give a temporary relief.

What you need is to wake up your liver. This can be done by using a natural, non-toxic, and safe liver stimulant. It will not only wake up your liver, but it will also give you a general feeling of well-being.

Don't let your liver lie down. It will soon be up and working. It will give you a new lease on life. It will make you feel like a new man. It will make you feel like a new woman. It will make you feel like a new child.

The first headache is said to have been in the 17th century.

Roast whale was offered at Blackball, England, recently.

Nervous—Could Not Sleep Tired Out All The Time

Mrs. George Bellamy, Newswoman, N.H., writes: "I was so very nervous I could not sleep at night, and felt tired out all the time."

A neighbor told me about Milburn's Heart and Nerve Pills, and as she was using them at the time she gave me some to try. I found they were doing me so much good I pressed two boxes and they proved of wonderful help to me."

Has Become Proficient In Chinese Language

McGill Student Learned At Laundry To Talk Fluently

If everyone persevered as much as Gordon R. Taylor, of Ottawa, the Chinese laundry business would be revolutionized into the teaching profession.

When Taylor, now entering upon his M.A. studies at McGill University, was nine years old his father sent him to the laundry to get the inevitable two collars and one shirt. Immediately intrigued by the sing-song language he heard there he decided first to make friends with the Chinese, his later instructors in their language.

This accomplished he, over a period of years, exhausted the knowledge of his instructors and was turned over to an old Chinese teacher.

Armed with his knowledge, Taylor strode into the office of Dr. Kiang Kang-hu, professor of Chinese studies at McGill University, and burst into a flood of Cantonese, which left that savant gaping. A graduate of Queen's University, Taylor speaks, reads and writes the southern Chinese dialect.

He hopes to go to China, some day.

Winnipeg Newspaper Union

By Ruth Rogers

The Bishop of London has been petitioned from time to time to sell many of the Wren churches, standing as they do on land of enormous value, and offer the proceeds to the Church of England funds. But there always is an outcry, and the agitation dies down.

St. Christopher also designed some of the halls of the trade guide and other public buildings, some of the towers of Westminster Abbey, part of Hampton Court, the restoration work of several cathedrals which are the glory of England.

But his greatest monument is St. Paul's. He is buried in the Choir of the Cathedral. There is no great tomb over his remains as there is over Nelson and Wellington, but above the choir entrance is a tablet which says: "Beneath is laid the builder of this church and city, who lived above thirty years, not for himself but for the public good. Reader, if thou seekest his monument, look around."

There could be none fitter.—St. Thomas Times-Journal.

Perkins' hair promotes cleanliness, charm and beauty. It is unrivaled in its magical effect on the skin. Swiftly absorbed by the tissue, it leaves a more velvety softness than any other hair cream. It is the only hair cream that does not leave the hands fatty and white, but leaves them soft and pink.

It is the inevitable choice of the woman who cares.

Another Advocate of the Wide Shoulder is the Buttoned Caplet.

Here's a simple model of rum brown rough crepe silk that meets daytime occasions smartly, except those of formal character.

It's a dress that's no easy to wear. It is especially easy to fashion, and can be made at a small outlay.

Style No. 920 is designed for sizes 14, 16, 18, 20, 22, 24, 26 and 28 inches bust.

Carried out in gray wool crepe with the cape collar and turn-back cuffs of black crepe and worn with a black leather belt, it's ultra-smart.

Black rough crepe with the deep capelet and turn-back cuffs of white crepe is suitably lovely.

Size 14 requires 2 1/2 yards 36-inch with 1/2 yard 28-inch contrasting and 2 yards plating.

Price of pattern 20 cents in stamps (cash value is preferred). Wrap cut carefully.

Recipes for This Week

(By Betty Barclay)

RAMBLIN' OF CHICKEN

5 tablespoons quick-cooking tapioca
 1 cup milk
 1/2 teaspoon salt
 Dash of cayenne
 1 tablespoon parsley, finely cut
 1 tablespoon butter

2 1/2 cups cooked chicken, chopped
 Combine quick-cooking tapioca, milk, salt, cayenne, parsley, butter and chicken. Let stand until mixture thickens slightly (5 minutes). Turn into greased terrapine or 8-cup casserole. Bake in moderate oven (350 degrees Fahrenheit) 25 minutes, or until done. Serves 6.

COCONUT PUFFS

3 egg whites
 2 1/2 teaspoons cornstarch
 1/2 cup sugar
 Dash of salt
 1 1/4 cups shredded coconut
 1/2 teaspoon vanilla
 1/2 teaspoon almond extract

Place egg whites in top of double boiler and beat until stiff. Mix cornstarch with sugar and beat gradually into egg whites. Place over hot water and beat about 2 minutes, or until thick around edge. Remove from fire. Add salt, coconut, and flavoring. Drop from teaspoon on greased baking sheet. Bake in slow oven (325 degrees Fahrenheit) 5 minutes, or until slightly browned. Makes 30 small puffs.

The Most Familiar

A teacher had been telling an infant class about the Ten Commandments. In order to test their memory, she asked: "Can anyone give me a commandment containing only four words?"

A hand was raised immediately. "Well," said the teacher, "Keep off the grass," said the youngster.

Another Opinion On Weather

Sun Spots Prease Long Cold Winter Scientist Declares

The coming winter will be colder than last year and the summer, especially in February and March, will be considerably warmer. Prof. John A. Curtis, head of the science department at Tufts College, announced at Buffalo. He bases his predictions on observations of the sun, number and nature of movement of sun spots.

These solar storms, as Prof. Curtis terms them, are now diminishing in number or snow.

"According to Curtis' theory, the weather of the temperate zones is traceable to the activity of these spots. A severe solar storm will cause disturbances in the atmosphere near the Equator, which make themselves felt far to the north and result in rain or snow."

"The decreased number and magnitude of these sun spots means the radiation reaching the earth is unusually smaller," the scientist says, "but the excess radiation received during the past two years will prevent us from feeling the full effect of winter until the end of the season."

Makes Good Camera Subject

Prince Of Wales Most Photographed Person In World

Who is, amongst living mortals, the most photographed? A famous West End photographer says there is no doubt about the right answer. No man or woman alive has been so often photographed as the Prince of Wales, and of no other person are there so many photographs extant.

The demand for photographs of the Prince since his visit has been general throughout Scandinavia. No Hollywood star comes near him in this respect, and politicians are streets behind him. There must be hundreds of thousands of his photographs scattered all over the civilized and semi-civilized globe.

Fortunately the Prince makes a really good camera subject and comes out well. He has discovered, however, that people are apt to be a snare and a libel. He dislikes very much being snatched, but submits when the operators are professional experts, and when he knows they are taking him. Surprise snapshots are taboo.

BANANA MERINGUE PIE

1 1/2 cups (1 can), Eagle Brand Sweetened Condensed Milk
 1 cup lemon juice
 2 medium sized bananas (cut in small pieces)
 2 egg whites

1. Whip egg whites until stiff. 2. Whip lemon juice until stiff. 3. Whip bananas until stiff. 4. Whip condensed milk until stiff. 5. Whip all together. 6. Bake in 10-inch pie plate lined with Zwick-Pie crust. 7. Cover with meringue made by beating egg whites until stiff and adding sugar. Bake in a moderate oven (350 degrees Fahrenheit) until brown. Chill before serving.

ZWICK-PAC PIE CRUST Roll enough zwick-pac to make one cup crumbs. Mix with 1 cup Eagle Brand Sweetened Condensed Milk. Line bottom pie plate, packing mixture in well. Pour in filling as usual.

Blocking All-Round Record The British air ministry is completing plans for an aeroplane which it hopes will beat the world's altitude record. Recently a test pilot reached a height only two miles lower than Professor Piccard's record, made with a balloon.

The Newest Measure Aunt Maud, a negro cook, specialising in molasses cookies, was one day asked to give her recipe.

"It's an easy one," she replied. "Ah takes a cup of flour, more or less, and adds two gals of molasses."

"But," interrupted the questioner, "what are gals?"

"Why, honey, don't you know? When you have a jug of molasses and turn it up, the molasses says 'Gullup,' runs a little more, then says 'Gullup' again. Well, ah takes those two."

Italy will continue its bounties to Italian navigation lines.

Finland plans a big public-works programme.

DEFINITE HELP FOR DWELLERS IN APARTMENTS

Odorless way found to cook fish, cauliflower and cabbage

CANAPAR IS A PRODUCT OF HAMILTON FIRM

Lives there a woman, in apartment, duplex or bungalow who has not at some time or other reluctantly foregone fish, cabbage and cauliflower because of the odors they give off when being cooked? Or who has been annoyed by the odors from other people close by who cooked these foods regardless?

Canapar merely does away with this annoyance. More than that, it actually improves flavor and food value. Cooking in Canapar makes the famous French method of steaming and confining food and its flavor to the closed casserole.

Canapar comes in large sheets in a handy package. When boiling vegetables you simply wrap the sheet of Canapar around and make a bag similar to a pudding bag. If you are steaming, you use your steamer with Canapar, arrange food and seasoning, and fold back corners of the Canapar to prevent steam from dripping back.

Boiled or steamed fish is particularly delicious done this way. No fishy odor in the kitchen, no pungent taste to dine. When roasting meat, line the pan with Canapar. It prevents the fat and juices from burning, and eliminates scorching of the pan surface.

Canapar saves fat. You can cook these vegetables simultaneously in the same steamer with it, without intermingling of flavors. And it is very economical. It is so easy to use that even a child can use it on the towel rack in the kitchen. Use it over and over again.

For all women use Canapar for a dish cloth—it is so silky and satisfactory and does not shrink. This is a marvelous good use if you happen to prefer the sheet of Canapar. It is a perfect answer to the cooking of fish. Canapar is made by the world famous firm in the Green Box.

Special Offer
 Most women and department stores sell Canapar. If you don't find it, send me coupon direct and we'll give you a new and better book entitled "Let's Live" containing one hundred recipes as a bonus for your trouble.

Applied Patent Products, Ltd., Hamilton, Ontario.

Enclosed find 25c for which please send me one full-size package of CANAPAR. Coupon for 100 recipes for "Let's Live."

More mothers each year.. check Colds

2 WAYS at once!

More and more mothers every year turn to the double action of Vicks VapoRub in checking colds, coughs, sore throat and spasmodic croup.

Rubbed on throat and chest at bedtime, Vicks acts through the skin like a plaster. At the same time, its medicated vapors, released by the heat of the body, are inhaled direct to the air-passages.

This double action of Vicks breaks up congestion and eases breathing, thus preventing the night cough which so often bores both mother and child of restless sleep.

Being an external treatment, Vicks is especially recommended by mothers because it could be the cause of "croup" which is often distressing children's delicate throats.

CHAPTER I. The Killers

Father Claverly, leaning against the rail of the "Midnight Sun" suddenly straightened up, stiff with shock; and stared incredulously at the six men.

For moments he could not believe he actually was witnessing a robbery. Here in this Canadian Northland where outlaws were rare and fur-trail, here on the mighty Mackenzie where river boats time and again carried unguessed cargoes of half a million in furs and gold, a brazen daylight attack upon a big steamer was simply unthinkable.

A few minutes ago the six men in a pair of black-bark canoes had skirted out of the tributary river, the Big Ahooka, and waited the steamer as though they were merely trappers or a trading party wanting passage up south. A ladder was innocently let down for them, and they had come aboard, taking a despicable advantage of the friendly, accommodating spirit extended from man to man in this North country.

Now, under the leadership of a huge red-bearded fellow, they stood on a pile of deck cargo amidst the, watching each way. With repeating rifles alert in their hands, they loomed ugly and menacing over the crowd.

Father Claverly, quickly recovering from his shock, stared sharply at the six men, trying to identify them. One was a breed; the other five were nondescript whites. All of them were unknown to him.

While he was wondering what their next move would be, a girl among the passengers suddenly cried out:

"Bandits! They're bandits! Oh—oh—"

To half the people aboard the "Midnight Sun" the girl's cry was a first warning of the holdup. Whirling, the passengers stood transfixed, staring at the six vicious strangers who had them covered.

Fearful of bloodshed, Father Claverly glanced round at the crowd. Realizing that a fight would turn this deck into a shambles, he prayed that somehow, by quick thinking, he could avert a battle.

There were courageous men among those fifty on deck; but only one man had the quiet, steady courage to draw a long belt-gun against six rifles.

His name was Jimmy Montgomery, mate of the steamer.

Crushed beside a bale of woolens, Jimmy had been pointing out things ashore to his four-year-old daughter, "At the cry he glanced up, saw the bandits, understood instantly; and his face hardened. He was Mount-trained, Jimmy was—seven years in the coast-and-gold Mainlanders of the Right. Showing his baby girl behind the wolf's pelt, he whispered, "Lie down, watch, keep down, down," and rose to his feet.

His first bullet, fired from the hip, sang between two bandits and whizzed into the pine beyond. His second knocked the floppy slouch from a bandit's head. His third was never fired. A savage spoke out sharply. Jimmy grabbed at his breast, his revolver dropped to the boards, he swayed a moment, then sank down, shot cleanly through the heart.

Father Claverly heard a mutter arising among the crowd; heard the shuffling of feet, the half-hysterical sobbing of women, the muttering oaths of men. Out of the corner of his eye he saw men glancing at one another, waiting for one of their number to raise the long roll; and he realized that this ominous, swelling mutter was the prelude of a concerted rush.

The bandits raised no roll, too. It was plain to Father Claverly that they had not bargained on a battle, and were covering at the prospect of resistance. But there was no retreating now; they would be forced to fight.

In a flashing thought he envisioned this as it would be a few moments hence, the criminals, rifle-armed, shooting from cover of the cargo piles; the blood-spattered promenade, with women and children caught in that swath of death.

In the next instant Father Claverly saw how he might stop the slaughter. He rushed forward from the rail, he uplifted his arm to draw the eyes and attention of the bandits. Obvious to personal danger, thinking only of the innocent lives he might save, Father Claverly walked up closer, closer, till the criminals could have touched him with their guns. Bitter his calm smile or his black rock but play power

over those rifles, for the minutes swarmed aside from him.

"Don't shoot again," he bade quietly, as one with authority. "You have killed a man. You have murdered."

The dark-faced bandit who had fired the shot flinched before that steady accusing gaze, and turned his eyes away from Father Claverly's.

"I was compelled to kill him. He should not tried to interfere with us," Father Claverly shouted so firmly a justification of a brutal killing. Turning away from the bandits, he faced the crowd. Steady, clear, his voice rose:

"Men! Don't stir! Don't make a shambles of this deck. There's nothing aboard this boat as precious as the lives that would be lost. Let them take what they want and go peacefully."

His appeal fell on deaf ears. A slow vengeful wrath was gathering. . . . Jimmy Montgomery, known and loved all along the Mackenzie, lay murdered there on the deck. . . . Those killers were going to pay for that barbarous crime.

The snarling oaths rose again; the muttering swelled audibly; hands crept down and closed upon belt-guns.

It was the bandit leader who stooped the run, who stopped it dead short at a snarl. Swinging his gun at a young schoolmistress, Margaret Fournier, one of the passengers, he ordered her, "Step up here, sister;

she looked like a woman with an Audubon snick and pointed it at the boy's breast.

Step up closer," and when she obeyed him, wild-eyed with terror, he cocked his weapon with an audible snick and pointed it at her breast.

His voice rose so that the whole deck heard.

"Now shoot! You can't get me afore I can get her! First move I see made with a gun, I'll give her what she gets there on the boards just got!"

Without turning or averting his rifle from the girl, he bade two of his men:

"Andra, you and John go below. Get the dust, sort out some furs, too, good furs, six or seven hundred pounds—marten, mink, dark fox. You know what's light and valuable."

The two bandits stepped down and seized one of the crew and made him take them down the companionway. Copping up presently, they lowered their booty into the two birch-bark canoes that bobbed against the side of the steamer.

As though every man aboard realized that the bandits held the whip-hand, that no one dared stir, that retribution must come from elsewhere, a whisper started, spontaneously, from a dozen points at once:

"Baker! Aha! Baker! Sgt. Alan Baker!"

This whisper went from neighbor to neighbor, from group to group; and men smiled grimly as they heard this mere mention of a man's name:

"Baker! Sgt. Alan Baker—at Fort Edmonton!"

Another of the bandits protected by that rifle pointing at Margaret Fournier's breast, walked boldly out among the passengers and securing a fire ax, he went from boat to boat on deck, smashing their frail sides so that there could be no pursuit, no retribution, if the two canoes could only get out of rifle range of the steamer.

Seeing now that the threat to Margaret Fournier's life had checked all thought of a rush, Father Claverly walked toward the stack of woolens, creating himself as he stepped over the dark stream of blood that trickled slowly toward a scupper.

Bandaging, he plied up the little Montgomery girl, who was looking with wide, uncomprehending eyes at the body of her father. Mercifully taking her away from there, he walked over to the rail, holding the little tot so that she could not look back.

The man beside him said in a low voice: "Look at that devil smashing the boats! They must have planned that 'caution' beforehand, so we couldn't chase 'em. But don't that big red-haired devil know we'll be splattering their canoes afore they get ten rods gone?—G—d—what've they do to them yet?"

The whisper spread. . . . "Wait! Wait! They start away. . . . Men folded their arms, and watched quietly, biding their moment of vengeance.

And then, when the canoes were loaded with their booty, the red-bearded leader played his last and best card. Flipping his gun at Margaret Fournier, he ordered her:

"Get down into one of them canoes, sister. We're going to carry you a couple miles up this Big Ahooka here and set you off on a bar, see? We'll be meaning to harm you at all. Just start talking over and climbing down into a boat. . . . That's right; that's a sensible girl. . . ."

He raised his voice so that every one could hear; he spoke to Margaret Fournier, but his words were intended for the men aboard:

"None of the fellows is figuring to shoot I—out of us afore we can get clean gone, see? But they'd better think twice about that. And I guess they will. First bunch of lead comes whizzing our direction, you'll get a bullet square 'stween them pretty eyes, sister!"

Little Helps For This Week

"The kindly affectioned one to another with brotherly love, to honor preferring one another."—Romans 12:10.

"In her tongue is the law of kindness."—Proverbs 31:26.

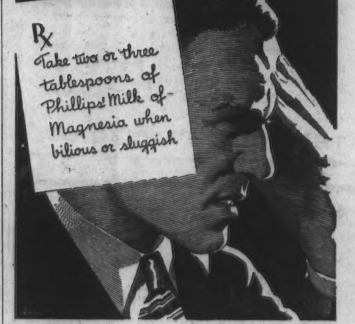

Since trifles make the sum of human things. And half our misery from our foolish springs: Since life's best joys consist in peace and ease. And though but few can serve, yet all can please. Oh, let the magnetic spirit learn from Jesus. A small unkindness is a great offence.—Hannah More.

All usefulness and all comfort can be prevented by an unkind, ungenerous temper of mind, a mind that can bear with no difference of opinion or temperament. A constant irritability, an unquieted temper, will more than neutralize all the good you can do, and render life nothing but a blessing. You have not fulfilled every duty unless you have fulfilled that of being pleasant.—Albert Barnes.

Perish, pain, restlessness, and sickly children, owe their condition to worms. Mother's Grave Worm Expeller will relieve them and restore health.

China is buying more motor cars this year than last by nearly 15 per cent.

FREE "RUN-DOWN"

Take two or three tablespoons of Phillips' Milk of Magnesia when bilious or sluggish.

The sensible way—the doctor's way—of treating that sluggish, "run-down" condition is to use Phillips' Milk of Magnesia. Try it instead of something just to "move the bowels." See how much better you feel—and continue to feel for days after! The antiacid action clears the system of all those poisons that cause headaches, fatigue, loss of appetite. Get the genuine; look for Phillips on the wrapper.

ALSO IN TABLET FORM. Phillips' Milk of Magnesia Tablets are now on sale at drug stores everywhere. Each little tablet is the equivalent of a teaspoonful of genuine Phillips' Milk of Magnesia.

Made in Canada

PAIN relieved instantly

Aspirin will dispel any pain. No doubt about that. One tablet will prove it. Swallow it. The pain is gone. Relief is so simple as that.

No harmful after-effects from Aspirin never depress the heart, and you need never hesitate to make use of these tablets.

So it is needless to suffer from headache, toothache or neuralgia. Rheumatism of sciatic limbs, rheumatism or neuritis can be banished completely in a few moments. Periodical suffering of women can be motioned away; the discomfort of colds can be avoided.

Aspirin tablets have other important uses all described by the proven directions in each box. Look for it is needless to suffer from every time you buy them tablets, and use them. Don't accept substitutes. "Aspirin" is a trade-mark registered in Canada.

The General Manager,
Imperial Bank of Canada,
TORONTO

We report that we have examined the above condensed Balance Sheet as at October 31st, 1932, and have compared it with the books and vouchers at the Head Office and with the certified returns from the branches. We have obtained all the information and explanations that we have required and in our opinion the transactions of the Bank which are shown under the heading have been within the powers of the Bank. In our opinion the above condensed Balance Sheet shows the true condition of the Bank. The above Balance Sheet does not include interest which has been set aside by the Shareholders from time to time for the purpose of a Pension Fund.
